

This Kaggle data set contains nutritional information on food.

Some columns include calories, fat and vitamins.

The screenshot shows a Jupyter Notebook interface. The code cell contains the following Python code:

```
import pandas as pd
df = pd.read_csv("FOOD-DATA-GROUP1.csv")
df.head()
df.describe()
df.info()
```

The output of the code cell is:

```
[2]: ✓ 0.0s
```

Below the output, the Jupyter Notebook displays the following information:

```
<class 'pandas.core.frame.DataFrame'>
RangeIndex: 551 entries, 0 to 550
Data columns (total 27 columns):
```

On the right side of the notebook, there are two buttons: "possible" and "comment".
